

# Project Update

## Eva Tilley Memorial Home

BRH Lounge Fish Tank

Hub Dining Area

Following on from our previous update, we hope you are all enjoying the recently opened Hub Dining and Lounge Areas.

If you get a chance, we would also encourage you to have a look at the 2.1m long BRH Lounge fish tank, which had the finishing touches installed last week (refer attached photo).

Works are currently being undertaken to House 1 & 2. To date we have completed carpet removal to the corridor areas and commenced painting works to bedroom doors and corridors.

As part of these works, SHAPE are also converting one of the existing rooms to a new DDA suite. The majority of demolition works has now been completed in this area and we will shortly begin construction of new walls and structural steelwork to this suite.
